

Name: Mrs. Beam

Big Question: What is the fastest animal on the planet?

Resource 1: "Peregrine Falcon." 11/28/2018. http://www.biokids.umich.edu/critters/Falco_peregrinus/	
Main Idea 1: Where does the peregrine falcon live? The peregrine falcon can be found all over the world!	Details: like to live in open areas like grasslands, tundra , and meadows. -prefer coastal areas and tundras the most -don't like tropical areas like rainforests. They lay their nest in crevices and cracks in a mountainside or high in the air. Possible text feature: Text box for tundra or crevice Picture with caption of habitats
Main Idea 2: What does the peregrine falcon look like?	Details: _____ _____ _____ Possible text feature:
Main Idea 3: How does the peregrine falcon hunt? What does it eat? The peregrine falcons breaks the backs of its victims before eating them for lunch!	Details: these birds like to swoop down from great heights. When they spy their food, they leave their perch and dive down to capture their prey in their talons. Then they break the animal's backbone with their beaks. -sometimes they even eat their prey in the air if its small like a lizard or mouse. -dive at a speed of at least 100mph, but they have also been timed at speeds over 200mph, which makes them the fastest animals on the planet! Possible text feature: Chart of other fast animals on the planet Video of falcon hunting
Main Idea 4: Since its so fast does it have any predators? What are they?	Details: _____ _____ _____ _____ _____ _____
